Enjoy working in challenging environments and confident in solving problems.

## SKILLS

Angular   Angular.js   JavaScript

TypeScript   HTML   CSS

Bootstrap   RESTful API   Git

GitLab   GitHub   Agile Methodology

Jira   Postman   Swagger

## PROJECTS

### Health Management Information System

📅 01/2022 - 12/2023   📍 Chennai, India

HMIS will be used by the doctors to verify the patient details through Registration number

- Worked on HMIS (Hospital Management Information System) for patient data verification using registration numbers.
- Enabled doctors to access patients' previous medical records efficiently.
- Contributed to reducing treatment delays through quick data retrieval and validation.
- Improved overall healthcare workflow efficiency by integrating digital patient tracking features.

### Integrated Excise Supply Chain Management System (IESCMS)

📅 12/2023 - Present   📍 Chennai, India

Developed IESCMS Solution to ensure product authenticity and accountability across all Uttar Pradesh Excise Supply Chain transactions.

- Managed application workflows including product requests, approvals, and transport pass generation.
- IESCMS Solution will be used by the consumer to verify the authenticity of the product sold.
- Providing an inherent use/benefit for the manufacturers, government and its citizens for using this solution.
- The solution should be accountable for all the transactions happening in multiple departments related to the Uttar Pradesh Excise in Supply Chain Management.
